

Implementation of telemedicine services at Odense University Hospital

Anne-Kirstine Dyrvig, Department of Quality and Research/HTA

Ph.d.-student

Current and future challenges for IT development and implementation at OUH

- Interoperability
- Clinical evidence
- Staffs' attitudes/organisational aspects
- Reimbursement

Main barrier:

Implementation chain

1. Idea
2. Suggestion to payers (board of directors)
 1. Mini-HTA
 2. If information are missing
3. Implement while carrying out research
 1. RENEWING HEALTH

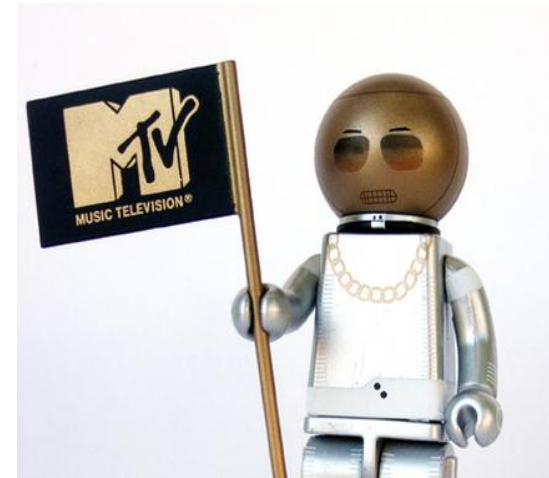

Systematic review of scientific evidence
Systematic analysis of data

Technology

Patient

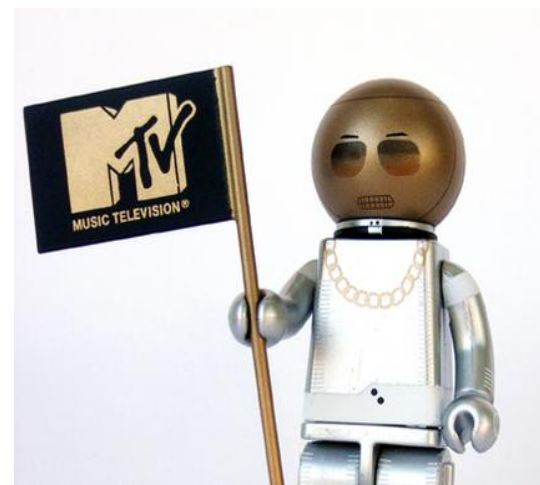

Organization

Economy

Advantages of the OUH-way

- What is hot?
- Plenty of ideas for improvement
- Knowledge of patient's needs
- Staff are the ones who have to implement anyway
- Staff have to apply for renewed reimbursement codes/values

Support opportunities

- SUPPORT!
 - Free access to scientific literature
 - Library
 - Administrative staff
 - Economists
- Regulation
 - Mini-HTAs are mandatory

Thank you for listening
